Frequently Asked Questions About Ticket Scanning

Can I use CodeREADr to create, sell, or distribute tickets?

No, CodeREADr does not handle ticket creation or sales. You should generate your tickets, either digitally or printed, and upload your ticket database to our platform via our website or API. Connect with third-party services to integrate your ticket IDs seamlessly.

What prevents guests from using the same ticket multiple times?

Our app includes a duplicate ticket checking feature that alerts users of any previously scanned tickets, ensuring each ticket is used once.

How can I scan NFC wristbands and barcodes?

Both iOS and Android devices are equipped with NFC readers. Depending on your event's needs, you can configure the CodeREADr app to scan NFC wristbands alone or alongside barcodes.

Is special hardware required for scanning tickets?

No special hardware is needed. CodeREADr is compatible with commonly used iOS and Android devices, including smartphones and tablets. You can use your own devices or purchase dedicated scanners.

Can I control the capacity of my event?

Yes, our Check-In/Out service allows you to set and manage event capacity, alerting you when the maximum number of attendees is reached and ensuring compliance with capacity limits.

Can I customize the app's appearance?

Absolutely! Our app customization options, available in both free and paid plans, allow you to customize the response screen, change text messages, and add your company’s logo.

Are both paper and digital tickets scannable?

Our advanced barcode scanners can read any type of barcode, whether printed or displayed on a digital device, ensuring flexibility and convenience for your event.

Does the pricing vary based on the number of scans?

No, our pricing is based on the number of devices using the app, with each plan allowing unlimited scans. The billing is determined by the number of devices logged in during your billing period, not by concurrent usage.

How does re-entry management work?

For re-entry, you can choose unlimited scanning of barcodes or utilize our Check-In/Out service to track individual attendee movements, ensuring precise control over event access.

What if the event location has poor internet connectivity?

The CodeREADr app can operate both online and offline, guaranteeing uninterrupted service regardless of internet availability.
