Global Availability of the CodeREADr App

Getting Started · https://www.codereadr.com/knowledgebase/global-use/

Access in China: CodeREADr is accessible worldwide, with the exception of China due to restrictions on Google’s Play Store. Android users in China who wish to use CodeREADr can obtain the application by directly requesting an APK file from support@codereadr.com. For iOS users, the app is readily available without restrictions.

Language Options for CodeREADr

Current Language Features

CodeREADr supports UTF-8 encoding for all dynamic content, which allows for a broad range of languages. Dynamic content includes:

- Barcode values (alphanumeric or numeric)
- Response text displayed after scanning
- Labels on the Response screen
- Question labels and user answers
- Service names and descriptions
- Text on the "Tap to Scan" screen
- Any other textual data configured within your services or entered by app users

Static Content Customization

Modification of static content, such as button names and error messages, is limited to our White Label version. The White Label service offers extensive customization options, with setup costs beginning at $1500 to $2,500 and an approximate setup time of eight weeks. Standard device licensing fees apply.

Enhanced Control with Kiosk Mode

A popular option for enhancing user experience is utilizing the Kiosk Mode, which offers greater control over what users see upon logging into the app. This mode is ideal for businesses seeking a tailored interaction in their services. Learn more about Kiosk Mode and its benefits for barcode scanning.
