# Collaborating with Service Providers Using CodeREADr

Getting Started · https://www.codereadr.com/knowledgebase/working-with-service-providers/

## Add Value through Integration

Elevate your data capture and collection capabilities by integrating CodeREADr into your services. Whether you're offering simple setups for your clients or engaging in advanced API integrations, CodeREADr's flexible platform enhances the way you manage and implement services.

## Issue App-User Credentials

Utilize either CodeREADr's Web UI or API to create tailored services for your clients. Issue unique app-user credentials, allowing clients to access these services through the CodeREADr app available in app stores. For those with a branded experience, direct clients to download your customized white label version of the app.

Once credentials are provided, your clients will have the services automatically loaded onto their devices, facilitating seamless recording, tracking, validation, and data collection. This setup ensures your clients get the most out of CodeREADr without needing to navigate or learn the CodeREADr.com interface themselves.

## Reporting and Data Access

- Utilize API for Integration
  - Connect your services directly using our comprehensive Web service APIs. For detailed guidance, visit our API documentation.
- Implement Postback URL/Webhooks

    - Employ Postback URLs and webhooks to manage scanned barcode IDs directly on your servers. Learn more about setting up Postback URL and Direct Scan to URL (DSU) here. In certain scenarios, you might prefer that clients create their own accounts on CodeREADr.com, using a company-specific Postback URL/Webhook you provide. They can then select a standard paid plan and manage payments directly with CodeREADr.

- Offer Downloadable Reports
    - Generate unique CSV download links for each client, enabling them to view and export tailored reports online.

- Integrate with Third-Party Databases
    - Connect effortlessly to third-party databases like Google Sheets, Excel, and QuickBase without coding, or use API-connecting services such as Zapier for seamless data insertion.

- Schedule Regular Exports
    - Facilitate scheduled scans and data exports using Email, FTP, SFTP, Dropbox, or Amazon S3, enhancing regular data management.

## Billing Options

CodeREADr offers flexible billing solutions tailored to your service model. You can either bill clients directly based on the services provided, or allow them to set up individual accounts on CodeREADr.com for direct payments.

## Branding and Customization

Discover the full potential of branding and customization with CodeREADr App. Learn more about personalization options, including 'Webify' features and the use of contextual variables, to enhance your client's user experience.

## Best Practices for CodeREADr Usage

Access a wealth of resources including best practices articles and instructional videos tailored to optimize your use of CodeREADr for various applications. Find all the resources you need to maximize efficiency and client satisfaction.
