

Alter Response HTML

For the "Pattern" field on the Advanced step when creating a Service:

```
^\s\S]*?),(\s\S]*?)$
```

For the "Pattern" field on the Advanced step when creating a Service:

```
<html>
  <head><meta name="viewport" content="initial-scale=1">
    <!-- Use this Alter Response RegEx "^\s\S]*?),(\s\S]*?)$" -->
    <script type="text/coderead" id="regex_replacement">
      { "bin": "$1", "color": "$2" }
    </script>
    <style>
      body { background-color: black; }
      .center {
        margin: auto;
        max-width: 50%;
        border: 3px solid black;
        padding: 15px;
        border-radius: 10px;
        text-align: center;
        font-size: 1in;
      }
    </style>
  </head>
  <body>
    <div id="bin" class="center">...</div>
    <script>
      var responseText = document.getElementById("regex_replacement").innerHTML;
      try {
        var data = JSON.parse(responseText);
        var binElm = document.getElementById("bin");
        binElm.innerHTML = data.bin;
        binElm.style.backgroundColor = data.color;
      } catch (e) {
        console.log("ERROR: "+e);
        document.getElementsByTagName("body")[0].innerHTML = responseText;
      }
    </script>
  </body>
</html>
```
